DETAILED ACTION

Allowable Subject Matter

1. Claims 1-10 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Prior Art of Fraccaroli (US 6,549,768) discloses a mobile matching system. Fraccaroli teaches user's matching profile, a request profile and matching parameters for matching mobile users in a common location. Once a match is found, part of a user's information, such as a telephone number, is sent to a matched mobile user. Fraccaroli also teaches an USER ID for identifying a particular user and for updating the location information of said particular user, and a user may gain access (inherently, with user ID and password) to a secured Internet page to interact with his/her profile. Fraccaroli fails to teach an update code transmitted from a mobile station, and upon receiving said update code by a wireless network, said network updates at least part of a subscriber's information, wherein said subscriber information indicates an interest of the subscriber to be matched with an interest of another subscriber.

Prior Art of Sanchez (US 6,449,479) discloses an apparatus and method for mobile subscriber service modification. Sanchez teaches that a subscriber may transmit a feature code to gain access to change his/her service features. Sanchez fails to teach a network updating a subscriber's profile upon receiving same features code.

Fraccaroli and Sanchez, either alone or in combination, fails to teach the update code recited in the current invention.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a) US 6,819,919 (TANAKA) discloses a method for providing matching and introduction services to proximate mobile users.

b) US 6,052,122 (SUTCLIFFE et al.) discloses a method for matching registered profiles.

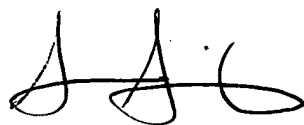

c) US 6,618,593 (DRUTMAN) discloses a location dependent user matching system.
